1987 · 1988

Park User Statistics

FISCAL YEAR SUMMARY

Alberta
RECREATION AND PARKS
Parks Division

P R E F A C E

The Park User Statistics reporting structure involves the production of three documents:

1. the Monthly Camping Statistics Summary throughout the peak season;
2. the Peak Season Summary available in approximately December of each year; and,
3. the Fiscal Year Summary available in approximately June of each year.

With this reporting structure, it is hoped that Park User Statistics are made available at a time appropriate to budget preparation cycles, manpower planning, program planning, monitoring and evaluation.

The Parks Division of Alberta Recreation and Parks, collects visitation information through three basic systems:

1. Camping - permit sales, reasonable estimates and camper surveys;
2. Day Use - Automatic Traffic Counter readings and traffic surveys; and,
3. Group Use - permit sales.

These collection systems are discussed in the Introduction Section.

This report presents a summary of park user statistics for the 1987/88 fiscal year. Data herein have been collected at the management unit level for Provincial Parks, Sub-Districts within Kananaskis Country, and Provincial Recreation Areas (P.R.A.'s). For each of these levels, appropriate user statistics for camping and day use are included. Area Level Statistics (i.e. campgrounds, day use areas, group use areas), although not reported in this summary, are available upon request.

Alberta Recreation and Parks is pleased to provide for your use, the second annual "Park User Statistics - Fiscal Year Summary" report. Inquiries requiring further explanation of the methodology are welcomed, and should be directed to Barry Bentham or Roy Finzel at 427-2968.

INTRODUCTION

Implementation of the revised P.U.S.C. System, following a revision study, occurred in April 1986. This report presents Park User Statistics for the period of April 1, 1987 to March 31, 1988. Information is presented for all Provincial Parks, Sub-Districts within Kananaskis Country and Provincial Recreation Areas outside of Kananaskis Country at the management unit level. Sub-management unit level statistics (e.g. individual campground statistics) are not reported, but are available upon request.

Tables summarizing camping, day use, and group use statistics are included in this report. Brief descriptions of the data collection methodologies used for each category of use statistics are presented below.

Camping Statistics

Camping statistics are based primarily upon information obtained from camping permits. These permits are issued via two systems: the Standard Camping Permit and the Self-Registration Permit (envelope) systems. In the absence of permit sales (eg. some campgrounds in the off-season), reasonable estimates of camping use are provided by park staff. Information collected through these systems is summarized and transferred to the Park User Statistics Summary (P.U.S.S.) sheet to record monthly camping statistics. This includes data on camping party nights, turnaways, and site closures.

The Standard Camping Permit provides information on camping party nights and average camping party size (by means of a periodic survey of camping permits). Combining this information enables calculation of individual camper nights (see Glossary, page 11). Camping party nights are based on the premise that a site is considered occupied

when a permit has been issued and that site is occupied by the permittee and at least one camping accommodation unit. Campground turnaways are recorded each time a camping party is personally turned away because no campsites were available. This information is then recorded on monthly P.U.S.S. sheets and is presented in this report.

Self-Registration Permits also provide statistics on camping party nights, but require a periodic self-registration camper survey to provide data on camping party size. Turnaway counts are not always applicable owing to the self-administered nature of registration. A significant change to the system in 1987 was the introduction of Self-Registration to Provincial Recreation Areas, as of April 1, enabling the application of statistics collection methodologies based upon permit sales (i.e. as used in Provincial Parks).

By way of a caution, it is important to note that in any self-registration system, non-compliance (i.e. campers not voluntarily completing a permit and submitting money) can adversely affect the reliability of estimates of camping use. This problem is normally accounted for by ranger compliance checks and the inclusion of non-complying party night figures. For Provincial Recreation Areas however, where patrols cannot always be made daily as in Provincial Parks, the resulting reduction in the amount of adjustment for non-compliance can result in an under-estimation of camping use.

Campground occupancy data are determined from analysis of: (1) campground capacity, (2) number of weekday and weekend days in a specific month, (3) number of sites affected by a closure per day, and (4) total camping party nights per month. Refer to the Glossary for the calculation procedure of campground occupancy rate and average daily percent campground occupancy. In addition, overflow party night figures are included in the occupancy data tables whenever appropriate. This figure represents the monthly totals of overflow camping party nights and is reported at the park level only.

Where possible (depending on availability of information), previous years' camping party night figures are tabulated in a historical comparison table for a five year period. Due to the change in the collection methodology at Provincial Recreation Areas, no historical comparison is provided. Adjusted Regional and Provincial comparisons of camping use excluding Provincial Recreation Areas are provided through table footnotes.

Day Use Statistics

The collection methodologies used as well as the completeness of the statistics reported differ significantly between the peak season (April 1 to September 30) and the off-season (October 1 to March 31).

a. Peak Season

An evaluation of data collection procedures in 1981, concluded that the existing non-systematic and inconsistent methodology of data collection resulted in day use statistics which were not considered to be accurate. Consequently, a day use calibration program was instituted in the summer of 1983 and since then, all provincial parks (with the exception of Long Lake) have been surveyed. This includes sub-districts within Kananaskis Country.

For sub-districts within Kananaskis Country and Provincial Parks, peak season day use statistics are now based on figures collected from automatic traffic counters. Adjustments to these values are determined by the ratio of day use vehicles to all other vehicles entering or exiting the park and mean party size. Both adjustment factors are obtained by a periodic (every four years) day use calibration program. The day use calibration program involves the stopping of traffic on 20 randomly selected days during the peak season, to conduct a brief interview. Both this information and the daily vehicle counts are analyzed to yield estimates.

For Provincial Recreation Areas outside of Kananaskis Country, 1987 peak season day use statistics are based upon the relative relationship between camping and day use (as determined from the 1982 Provincial Recreation Area Survey) multiplied by the current camping use figures. The result of these calculations represent, at best, minimums.

A methodology for the collection of day use statistics at Provincial Recreation Areas is currently being developed. This methodology would see Automatic Traffic Counters installed at all Provincial Recreation Areas as the primary data collection instrument (as in Provincial Parks). Traffic counts would be adjusted for camper traffic (from permit sales, taking into consideration non-compliance and multiple entries and exits) and non-recreational vehicles (from records of park staff) to yield estimates of day use visitation. This method is called the Residual Approach. It is hoped that the majority of Provincial Recreation Areas would be on this system beginning in 1988.

b. Off-Season

As of October 1, 1987, reported off-season day use statistics for both Provincial Parks and Provincial Recreation Areas are based upon automatic traffic counter readings. For the majority of areas, these readings are adjusted for camper traffic (from permit sales, taking into consideration non-compliance and multiple entries and exit) and non-recreational vehicles (from records of park staff) to yield estimates of day use visitation. Subjective estimates of day use not based upon automatic traffic counter readings are <u>not</u> reported due to the incompatibility of statistics between areas and years when derived in this manner.

Historical comparison tables only include Provincial Park day use figures for years following implementation of a Day Use Calibration Program. Adjusted Regional and Provincial comparisons for day use excluding Provincial Recreation Areas and Kananaskis Country (studied in 1987) are provided through footnotes.

Group Use Statistics

A standard system for collecting group use statistics was implemented in 1986. No prior statistics are available. Currently, the group use permit system enables collection of information pertaining to group camping unit nights, individual group camper nights, and occupancy. A survey component of the group use permit (every four years) provides the average number of people in a group unit. This figure is required to calculate individual group camper nights.

An appendix has been included in this report to complete the information requirements relevant to the reporting of Park User Statistics.

GLOSSARY OF TERMS

CAMPING

AVERAGE CAMPING PARTY SIZE: Average number of people in camping parties. This is determined for each area by a periodical survey of camping permits.

AVERAGE DAILY (WEEKEND/WEEKDAY/TOTAL) PERCENT CAMPGROUND OCCUPANCY:

$$\text{SUM OF: } \frac{\text{TOTAL CAMPING PARTY NIGHTS FOR SPECIFIC TIME PERIOD}}{(\text{CAMPGROUND CAPACITY PER GIVEN DAY}) - (\text{\# OF SITES AFFECTED BY CLOSURE PER GIVEN DAY}) \times \text{NUMBER OF DAYS}}$$

CAMPGROUND OCCUPANCY RATE: (NUMBER OF NIGHTS AT PERCENT OCCUPANCY)

$$\frac{\text{CAMPING PARTY NIGHTS FOR A GIVEN DAY}}{\text{CAMPGROUND CAPACITY FOR A GIVEN DAY} - \text{NUMBER OF SITES AFFECTED BY CLOSURE FOR A GIVEN DAY}} \times 100$$

Note: Sum the number of nights for a specific percent occupancy.

CAMPING ACCOMMODATION UNIT: A tent, a tent trailer, a travel trailer, a motor home, a van, or a truck camper.

CAMPING PARTY NIGHT: One site occupied for one night.

CAMPING PARTY SIZE: The total number of people present on an occupied site (regardless of the number of camping accommodation units occupying a site).

GLOSSARY OF TERMS

GROUP AREA NIGHTS AVAILABLE:

NUMBER OF GROUP USE AREAS X NIGHTS PER MONTH - GROUP AREAS CLOSED PER MONTH X NIGHTS AFFECTED

GROUP AREA NIGHTS OCCUPIED: Sum of the number of nights a group use area has been actually occupied over a specified period of time.

GROUP CAMPING UNIT NIGHT: One camping accommodation unit in an area, designated as a group use area for one night.

INDIVIDUAL CAMPER NIGHTS: Average camping party size X camping party nights.

OCCUPIED SITE: A site for which a permit has been issued that is occupied by the permitee and at least one camping accommodation unit.

OVERFLOW PARTY NIGHT: One camping accommodation unit in an area designated as an overflow area for one night.

SITE NIGHTS AVAILABLE:

CAMPGROUND CAPACITY X NIGHTS PER MONTH - SITES CLOSED PER MONTH X NIGHTS AFFECTED

TOTAL CAMPING PARTY NIGHTS: The monthly or seasonal totals of the individual daily sums of camping party nights.

GLOSSARY OF TERMS

TURNED AWAY PARTY: A party which has been informed, by a park representative, that they cannot be accommodated on account of all available sites being occupied at a specified time.

DAY USE

AVERAGE DAY USE PARTY SIZE: Average number of people associated with a vehicle entering a provincial park or provincial recreation area for one day or portion of one day without staying overnight. This is determined by a periodical survey of day users.

DAY USE PARTY: A number of people in a vehicle entering a Provincial Park or Provincial Recreation area for one day or portion of one day without staying overnight.

NOTE: In the case of "walk-in" day users, a party is considered to be one or more individuals who appear to enter the park together.

INDIVIDUAL DAY USERS: Person(s) making a recreational visit to a Provincial Park or Provincial Recreation area for one day or portion of one day without staying overnight.

HISTORICAL COMPARISON

	SUM					
	1983/84	1984/85	1985/86	1986/87	1987/88	% CHANGE FROM LAST YEAR
TYPE OF USE						
CAMPING PARTY NIGHTS	69827	70652	57836	60305	90021	
GROUP UNIT NIGHTS				1834	2135	16
DAY USE PARTIES	N/A	N/A	N/A	272325	258185	

Note: - The above 1987/88 Camping Party Night figures include P.R.A. use. Reported 1986/87 Camping Party Night figures do not include P.R.A. use due to incompatibility of collection methodologies. For comparative purposes, the 1987/88 Provincial Park camping party night total is 52,824. This represents a 12 percent decrease over 1986/87.

- The above 1987/88 Day Use Party figures include P.R.A. use but, 1986/87 does not. For comparitive purposes, 1987/88 Provincial Park day use party total is 248,270. This represents a 9 percent decrease over 1986/87.

- A system to calculate Group Unit Nights was introduced in 1986.

N/A - Figure not reported at this level as Day Use Study not completed for some Parks.

HISTORICAL COMPARISON

	SUM					
	1983/84	1984/85	1985/86	1986/87	1987/88	% CHANGE FROM LAST YEAR
TYPE OF USE						
CAMPING PARTY NIGHTS	38593	37315	45934	49667	44233	
GROUP UNIT NIGHTS				1761	2640	50
DAY USE PARTIES	N/A	N/A	N/A	119570	120620	

Note: - The above 1987/88 Camping Party Night figures include P.R.A. use. Reported 1986/87 Camping Party Night figures do not include P.R.A. use due to incompatibility of collection methodologies. For comparative purposes, the 1987/88 Provincial Park camping party night total is 42,733. This represents a 14 percent decrease over 1986/87.

- The above 1987/88 Day Use Party figures include P.R.A. use but, 1986/87 does not. For comparitive purposes, 1987/88 Provincial Park day use party total is 117,600. This represents a 2 percent decrease over 1986/87.

- A system to calculate Group Unit Nights was introduced in 1986.

HISTORICAL COMPARISON

	SUM					
	1983/84	1984/85	1985/86	1986/87	1987/88	% CHANGE FROM LAST YEAR
TYPE OF USE						
CAMPING PARTY NIGHTS	95428	94604	86018	101265	107690	
GROUP UNIT NIGHTS				3157	3651	16
DAY USE PARTIES	N/A	N/A	N/A	366768	390500	

Note: - The above 1987/88 Camping Party Night figures include P.R.A. use. Reported 1986/87 Camping Party Night figures do not include P.R.A. use due to incompatibility of collection methodologies. For comparative purposes, the 1987/88 Provincial Park camping party night total is 99,605. This represents a 2 percent decrease over 1986/87.

- The above 1987/88 Day Use Party figures include P.R.A. use but, 1986/87 does not. For comparitive purposes, 1987/88 Provincial Park day use party total is 381,725. This represents a 4 percent increase over 1986/87.

- A system to calculate Group Unit Nights was introduced in 1986.

N/A - Figure not reported at this level as Day Use Study not completed for some Parks.

HISTORICAL COMPARISON

	SUM					
	1983/84	1984/85	1985/86	1986/87	1987/88	% CHANGE FROM LAST YEAR
TYPE OF USE						
CAMPING PARTY NIGHTS	102947	91215	93873	95345	80488	
GROUP UNIT NIGHTS				1772	2165	22
DAY USE PARTIES	N/A	N/A	N/A	773163	894150	

Note: - The above 1987/88 Camping Party Night figures include P.R.A. use. Reported 1986/87 Camping Party Night figures do not include P.R.A. use due to incompatibility of collection methodologies. For comparative purposes, the 1987/88 Provincial Park camping party night total is 78,072. This represents a 18 percent decrease over 1986/87.

- The above 1987/88 Day Use Party figures include P.R.A. use but, 1986/87 does not. For comparitive purposes, 1987/88 Provincial Park day use party total is 889,920. This represents a 15 percent increase over 1986/87.

- A system to calculate Group Unit Nights was introduced in 1986.

N/A - Figure not reported at this level as Day Use Study not completed for some Parks.

101. James River Bridge P.R.A. (36)	30	20	50	110

( )* The number in the bracket represents the rank order of provincial parks alone and provincial recreation areas alone, based on individual day users.

EXPLANATION OF SYMBOLS
S.D. - Sub-District
P.R.A. - Provincial Recreation Areas

Note: - Only Peak Season Day use statistics for several areas (Kananaskis Country, Big Knife, Garner Lake, Long Lake, Notikewin, Rochon Sands, and Sylvan Lake Provincial Parks, and all the Provincial Recreation Areas in the Province) are available and are therfore included in the above table.

- Refer to individual park tables in text for factors influencing use.
